When Father
Fixed The Tire
(From Judge)

When father fixed the tire, us lugs
Kept still 'n mice ain't made no noise,
Some folks rode by, says, "Get a mule!"
I'd say, "Shut up, you blokin' fool!"
I can't tell what wpa says next,
Guess maybe 'twas his good text,
But sif looks peevish, ma looks sad
An' squinty-like at poor old dad.

COUNCIL MEETS TEN YEARS AGO

A meeting of the Blairmore town council was held last night, every other nationality but the Italians being represented.

The minutes of previous meeting were adopted, and communications were in order received.

Dr. MacDonald accepted the offer to fill the vacancy created by the resignation of Dr. Mackay as medical health officer, and his appointment will take place forthwith.

A letter was received from Col. Crickshank, suggesting that the town arrange to have an honor roll posted up or published in the local paper. Secretary was advised to take the matter up.

The following resolutions were passed, subject to the O.K. of the several countries:

Rocky Mountain Cement Co., \$30.80 for October light, J. Pozzi \$5.50,

A. Aneto \$2.50, J. Monticello \$2.50,

Colenell Distill gave notice that at the next regular meeting of the council he would introduce a by-law governing licensees.

Councillor Evans gave notice that at the next regular meeting of the council he would introduce a pound by-law.

Bartlett-Evans—That the Council sit at a Court of Revision on Thursday, November 11th, at 8 p.m.

By-Law 45 received its third reading and was finally passed.

Free Library At Bellevue

The Bellevue Club Room Committee is now in possession of one of the University free travelling libraries, consisting of forty volumes. Until the Club room is finished the books will be on a shelf in the south class room of the church, which will always be open to the public.

Each member will remain in the camp for four months, after which it will be returned to the University and another received. This will insure an ever-fresh supply of good reading material.

The conditions on which the University lend their libraries are: (1) That they be free to all, except a nominal charge to cover the cost of transportation to and from Edmonton. (2) That the books be used carefully, and that any damage to or loss of books be paid for promptly to the librarians.

In Bellevue the library will be run in connection with the club room, and the common club fee will cover all charges to members, except for damage or loss of books. But any one not wishing to join the club may have free use of the books on payment of 25 cents for each library, that is, 25 cents every four months.

Until a permanent librarian is appointed the books will be in charge of Rev. F. T. Cook.

The books in the present library are:

1. Cordwainer, Ballantyne.
2. Substitutional Tongue, Barrie.

3. Synopsis Solhakken, Bjornson.

4. The Shillale, Burnett.

5. Poems and Songs, Burnie.

6. Path Finders of the Great Plains, Burpee.

7. Shadow of a Great Crime, Cain.

8. Ian of the Orcades, Campbell.

9. Stories of Charlemagne, Church.

10. British Army, Illus., Clifford.

11. A Tale of the Macleod Trail, Connor.

12. The Brownies, (child), Cox.

13. The Lamplighters, Cummings.

14. Ranson's Folly, Davis.

15. One Brave Young, Dehan.

16. Collection of English Opium Eater, De Quincey.

17. Fishing, Dobson.

18. Rodney Stone, Doyle.

19. Mr. Barnes of New York, Gunter.

20. Ships That Pass in the Night, Guiter.

21. The Jungle Book, Kipling.

22. Adventures in the Arctic Seas, Leacock.

23. Charles O'Malley (1) Lever.

24. " (2) "

25. Doreen, Llyall.

26. Sir Gibble, McDonald.

27. Rural Life in Canada, Macdonald.

28. Kate Carnegie, MacLean.

29. Tomasso's Fortune, Merriman.

30. Ulysses, Phillips.

31. Hard Cash, Read.

32. Ivanhoe, Scott.

33. The Balkan Wars, 1913-1913, Summers.

34. Unvisited Places of Old Europe, Shuckleton.

35. Changing Germany, Tower.

36. Ben Hur, Wallace.

37. Robert E. Lee, Ward.

38. Friar Tuck, Watson.

39. The Man in Black, Weyman.

40. Sophia, Weyman.

Each book may be kept fourteen days.

Those interested should keep this list for reference.

In a few days the fiscal year will end, and in order to give the seconetary-treasurer an opportunity to balance up the town's books, it is desired that all who can will come forward with their taxes and water accounts.

(From The Blairmore Times, 1905)

October 21—John Kemmis promised a road through the Frank slide, should he be elected, so as to enable the farmers to have easy access to their market. He also promised to use his influence towards bringing about an Eight-Hour-a-Day Law for those who work underground. He also promised to increase the natural income of railway companies in this progressive country should prove sufficient inducement to any genuine company to commence operations.

A school teacher was robbed of \$110, and the police are dividing their time between a search for the thief and an inquiry as to how a school teacher got so much money.

Invitations are out for a grand ball at Coleman in honor of the second anniversary of the opening of the town.

The new public school at Coleman was opened this week, with many of the parents and other guests present. Alex. Cameron, chairman of the board, addressed the scholars, as did also Revs. McHenry, McDonald and Robinson.

The slope at the mines of the International Coal Co., at Coleman is now down nearly 800 feet, and switches are being put in for the two new entries. The new hoisting plant is about completed and installed.

An evening school was started in Coleman on Monday of this week, with quite a number of pupils.

John George, a Chaldean priest from Kurdistan, Asia, was in town on Monday collecting money to build an orphanage in his home country.

The capacity of the Zine-Sneiter at Frank is to be greatly increased, and already a force of men are at work clearing land for the additional buildings.

The big new washer at Lille is about completed, and from now on the coke turned out there will be not only of a superior quality, but the cleanest turned out in the Province.

Jack Kemmis, the Conservative candidate, visited The Pass twice during the week and rounded up his only supporter here, whom he offered to take home and still feed until after the election.

The Coleman miners will soon be in possession of the best equipped and finest wash-house in the Canadian West, as the company at that place are sparing no expense to make it fully up-to-date.

October 28—A very pretty wedding took place on October 19th at the residence of T. D. Bance, near Cowley, the occasion being the marriage of Serena Jane, daughter of T. D. Bance, to Francis Lewis, of Bellevue.

John F. Wilson, who has had charge of the project on Elk river, returned home on Thursday.

Tenders are invited for the erection of a miners' hospital at Coleman.

November 11—Work has been started on the Windsor Hotel at Landbreck. Smith Bros., of Coleman, have secured the contract.

A dance was held last evening at the residence of Mr. H. H. Pelletier, in honor of the fiftieth anniversary of the wedding of Mr. and Mrs. Pelletier.

Alberta's first election, which took place last Thursday, resulted in a sweeping victory for the Liberal party and a decided majority of their supporters in every constituency of their provisions for this government. The election in this riding resulted in a majority of 113 for John P. Macrolis, the Liberal candidate, over both Kemmis and Sherman, the Conservative and Labor candidates respectively.

November 18—W. A. Beebe's office and the Blairmore hotel are the first two places in town to be lit up by electric lights.

November 20—A side-track is being built back of the C.P.R. to be used to bring the ore to the smelter.

Contractor Tom Frazer has secured the contract for the erection of five neat and substantial cottages on Broadway for E. Morino.

(To be continued)

Mr. Gadby has been having some fun with a London paper which found "the Sam Hughes look" in the faces of the average Canadian soldier; and which saw "Sam's mouth as large as a dinner plate, like eye, a smiling grin and hair as wild as the Rocky Mountains." Mr. Gadby explains the mistake; it is, he says, Sir Sam's mouth that is like a man's mouth, and the rest of him is like a woman's.

Report comes that an Edmonton man has escaped from a Hun prison and reached London safely.

How War Affects Young Canadians

Capt. Pequegnat Says Experience Makes Them Much Finer Men

Because he was with the 1st Field Artillery in the first Canadian expeditionary force, Capt. Albert J. Pequegnat, who has been invalided home as a result of gas attacks, now has great graphic details of their terrible battle. But the captain left the telling of the awfulness of that grim struggle "to the men who were there." He came to speak of the war, but his story dealt mainly with the work of the Y.M.C.A. troops from the time they entered Valcartier until a few weeks ago. Briefly put, there was no suggestion of valour or personal heroism, but of the great humanitarianism and sympathy. All the great Russian writers, such as Tolstoi, Dostoevsky and Turgenev, all those who wrote of the suffering of man, have been particularly attractive to the Russian temperament. Russian literature, as well as history, has been a constant reminder of the nobility and heroism of a sort which many months back made the Y.M.C.A. officers indifferent to the "old folks at home." The more of the men had improved as a result of their work, and to be a Christian in warfare, said the captain. He told of the soldiers' knees at their bedside in prayer morning and night. When the war was over, many would return. It was a comparatively easy matter now to get soldiers to think of spiritual things. God gave us a better world; we would see old songs as "The Old Folks at Home" until tears would come into their eyes with the thought of the men whose boys were born in a mood for a good straight talk. To the 12th Rangers, Captain Pequegnat paid a high compliment, saying that they were a better bunch of fellows. Canada had the extreme honor to be the first Y.M.C.A. to be recognized by the British war A. C. officers were with Kitchener's army.

Capt. Pequegnat, in describing the trenches at the front, could not very well escape touching on what he called "the other side." He pictured himself, however, as a bullet which struck down here and there behind him as he walked, proceeding one night a double row of trenches from which the Germans were firing. Even the solace of his guide that it would only be a chance shot, while he might get hit, German trench were bodies of Germans and many British, and it was here that the captain relieved a dead German who had kept his rifle and kept it as a souvenir. Sixty yards in front was the first line of the advancing British troops, and twenty-five yards on the German trench. The Huns were then striving to drive back the Britishers, and between the two trenches were the bodies of the wounded, who had crawled on hands and knees and with hooks on poles risked their lives to bring them to safety. The wounded comrades. That the Germans had used the bodies of their own slain as barricades were noised about, but the captain said German soldiers are fit for anything.

Capt. Pequegnat was on the field of Langemarck, where the amazing number of men who ministered to the Canadians after the battle, and one touching incident he made reference. Lance-lieutenant John Pequegnat, a young lad, killed by gas, died in his arms. To a parish priest he applied for a spot in the graveyard of the village, and the priest, a young Canadian soldier. The priest, without the least hesitation, took the captain he could have as many graves as they were fit for, and the captain agreed that their graves would be tended forever. Such was the fame of Canadian soldiers had earned for themselves on the battlefield.

To Spend \$24,000,000 Feeding the Civilians

French Chamber Passes Bill Providing for Purchase of Wheat and Flour

The French chamber of deputies has passed a bill carrying an appropriation of \$21,000,000 to be used in the purchase of wheat and flour for the civil population. The limit of such purchases is fixed at 800,000 francs.

The bill, which is to be presented under the control of the minister of commerce to requisition wheat and flour in France, and empowers the minister to do so in foreign countries and colonies or abroad and to distribute supplies according to the needs. The measure also creates an advisory committee.

The new under secretary of war, Joseph Thizy, who is called minister of war, frankly admitted that there had been waste and disorganization in purchasing army supplies, but he assured the committee that the re-organization was well under way.

An attempt by the Socialists to inject a rider creating a government

of war and of grain was defeated by a vote of 364 to 138.

A tight oil citizen in a country village, on having a subscription list issued, found the list published in his heart for the place, thus excused himself:

"Paid five dollars for a new fence forty years ago, and now my folks haven't had the benefit of it yet."

Vast Sum Spent by Russians

Rapid Growth of the Red Cross Since War Began

It is not too much to say that the official recognition of the Red Cross as an international organization was the most important event in the history of the Russian government. The idea of universal charity and the brotherhood of man in the name of suffering is an ideal particularly attractive to the Russian temperament. Russian literature, as well as history, has been a constant reminder of the nobility and heroism of a sort which many months back made the Y.M.C.A. officers indifferent to the "old folks at home." The more of the men had improved as a result of their work, and to be a Christian in warfare, said the captain. He told of the soldiers' knees at their bedside in prayer morning and night. When the war was over, many would return. It was a comparatively easy matter now to get soldiers to think of spiritual things. God gave us a better world; we would see old songs as "The Old Folks at Home" until tears would come into their eyes with the thought of the men whose boys were born in a mood for a good straight talk. To the 12th Rangers, Captain Pequegnat paid a high compliment, saying that they were a better bunch of fellows. Canada had the extreme honor to be the first Y.M.C.A. to be recognized by the British war A. C. officers were with Kitchener's army.

Capt. Pequegnat, in describing the trenches at the front, could not very well escape touching on what he called "the other side." He pictured himself, however, as a bullet which struck down here and there behind him as he walked, proceeding one night a double row of trenches from which the Germans were firing. Even the solace of his guide that it would only be a chance shot, while he might get hit, German trench were bodies of Germans and many British, and it was here that the captain relieved a dead German who had kept his rifle and kept it as a souvenir. Sixty yards in front was the first line of the advancing British troops, and twenty-five yards on the German trench. The Huns were then striving to drive back the Britishers, and between the two trenches were the bodies of the wounded, who had crawled on hands and knees and with hooks on poles risked their lives to bring them to safety. The wounded comrades. That the Germans had used the bodies of their own slain as barricades were noised about, but the captain said German soldiers are fit for anything.

Capt. Pequegnat was on the field of Langemarck, where the amazing number of men who ministered to the Canadians after the battle, and one touching incident he made reference. Lance-lieutenant John Pequegnat, a young lad, killed by gas, died in his arms. To a parish priest he applied for a spot in the graveyard of the village, and the priest, a young Canadian soldier. The priest, without the least hesitation, took the captain he could have as many graves as they were fit for, and the captain agreed that their graves would be tended forever. Such was the fame of Canadian soldiers had earned for themselves on the battlefield.

The losses in the war go on the more negligibly because to the reasons which convinced so many Germans that Great Britain was an accident, and could not possibly win. The shock of war, the power of the shock of war. There were all-important factors which, it is believed, caused the Germans to say that they were without excuse in their reasoning or that they were wholly wrong? The war was a religious war, a war of God, an armorial, military, social and industrial—and the long strain has made all of them gay so with the exception of the last, which is the armistice which would lose all power of protection. Most thinking Britons knew that the war was won by the Germans that the general soundness and good sense of the people would carry them through. Little guessing did the people who were given the pleasure to which they were to be subjected.

French Chamber Passes Bill Providing for Purchase of Wheat and Flour

The French chamber of deputies has passed a bill carrying an appropriation of \$21,000,000 to be used in the purchase of wheat and flour for the civil population. The limit of such purchases is fixed at 800,000 francs.

The bill, which is to be presented under the control of the minister of commerce to requisition wheat and flour in France, and empowers the minister to do so in foreign countries and colonies or abroad and to distribute supplies according to the needs. The measure also creates an advisory committee.

The new under secretary of war, Joseph Thizy, who is called minister of war, frankly admitted that there had been waste and disorganization in purchasing army supplies, but he assured the committee that the re-organization was well under way.

An attempt by the Socialists to inject a rider creating a government

of war and of grain was defeated by a vote of 364 to 138.

A tight oil citizen in a country village, on having a subscription list issued, found the list published in his heart for the place, thus excused himself:

"Paid five dollars for a new fence forty years ago, and now my folks haven't had the benefit of it yet."

Commodore—What's his character, apart from his heart-breaking?

Petty Officer—Well, sir, this man's got a shore where he likes; 'comes off to a name, and language when he's spoken to; in fact, friends general behavior, 'e might be an officer.

Types Allowed to Pass

Johnny Bull isn't hard-headed. His decision to let ships bearing toys from Germany pass through the blockade has been lots of sympathizers among the little folks of the United States—Brooklyn Eagle.

Asked—Did Bob make any money on that chicken farm he bought?

Tellin—Did he? Why, he cut it up and sold the meat and the chicken coops for bungalows.

Vacant Lot Gardens

Excellent Results Secured, but Precautions Against Weeds Required

Reports from various cities and towns in Canada, as to the cultivation of vacant lots, indicate a general report inaugurated last spring for greater production and more extensive use of vacant land has been a success. The use of vacant land has been a success, and it is secured results commensurate with the allowing of intercrops, so as to be partially successful in others, also, circumstances militating against the use of the land, and the like. The arm commendation their bravery has received from the Canadian Cavalry Brigade dated August 26, 1915, reads as follows:

"We feel that great events are close at hand. Every man wants to share in some difficulty in making his contribution, up, which is rather sad, and certainly significant."

These are the words of the Canadian Cavalry Brigade.

"The key to the cutting off of her supplies, and the prediction is made that Australia will attempt to force a position, to the south, inaccessible and incapable of development at present, will develop centres of industry. But we are bound to the north, and the natural, logged areas and burned-over lands which surround many of our mines, and the like, will be developed within a decade or two, and may look across the future to the time when we can no longer afford to sit idly by, and the like. This is now being done by the Balkan states, part of the Balkan King Ferdinand having assented to a ministerial decree a few days ago forbidding the passage of timber across the frontier, and the country viewed in the light of Prince Asquith's outspoken remarks in the House of Commons, in this connection, the like of which has not been seen since the First World War. The letter, dated August 26, 1915, reads as follows:

"We feel that great events are close at hand. Every man wants to share in some difficulty in making his contribution, up, which is rather sad, and certainly significant."

Military observers agree that no great change will occur in the Balkans.

"The key to the cutting off of her supplies, and the prediction is made that Australia will attempt to force a position, to the south, inaccessible and incapable of development at present, will develop centres of industry. But we are bound to the north, and the natural, logged areas and burned-over lands which surround many of our mines, and the like, will be developed within a decade or two, and may look across the future to the time when we can no longer afford to sit idly by, and the like. Stopping Bullets

Experiments in Resisting Power of Clay, Earth and Sand

It is not as difficult as some imagine to stop a rifle bullet, though it is seldom wise to use a human body for the purpose.

During the winter campaign in Russia, for instance, it was demonstrated time and again that three or four feet of earth would afford an effective shield against rifle bullets at long range as the same thickness of stone or concrete, and the more loosely the snow was packed the more bullet-proof it became.

Experiments conducted by Russian military engineers along these lines showed that even at point blank range a rifle bullet will not penetrate eight feet of snow.

The use of clay in trench warfare an excellent opportunity has been afforded to test the resisting power of clay, earth and sand and some very striking and apparently anomalous results have been revealed.

Five feet of clay will stop a modern rifle bullet at the same range, and will stop three feet of loose sand, two and a half feet of sand, but three feet of tightly packed earth is not bullet-proof, nor high velocity shot will penetrate the same further at long distance than they will at close range.

This latter fact will appear more remarkable if it is borne in mind that the penetration of a bullet is usually affected as much by the air-resistance of the bullet as by its impact on the target itself. Thus it takes four feet of soft wood across the grain to stop a bullet fired at point blank range but only one foot of wood the same bullet would be stopped by two feet of the same kind of wood.

Again, while it takes 27 inches of hard wood to stop a bullet fired at point blank range, only 15 inches are required when the range is 500 yards. Why, therefore, should not a bullet normally penetrate at long range than at close range is more or less of a mystery.

Miller's Worm Powder will work so effectively that no traces of worms can be found. The pests are macerated in the stomach and pass away without leaving behind their shells. They make an entire and clean sweep of the intestines, and nothing in the shape of a worm can find a home in the body when these powders are in operation. Nothing could be more thorough or devious than their action.

Tommy came out of a room where his father was taking down a carpet. He was crying terribly.

"What's the matter?" asked the mother.

"Papa hit his finger with the hammer." Tommy replied through his sobs.

"Well, you needn't cry about a thing like that," comforted his mother.

"Why didn't you laugh?"

"I did," Tommy answered.

Corns Cured Quick Applied in 5 Seconds

Sore, blistering feet from corns—pinched toes can be easily relieved by Putnam's Extractor. In 24 hours, Putnam's cures away that drawing pain, eases instantly, makes the feet feel good at once. Get a 16 oz bottle of "Putnam's today."

Experiments in Crop Production

Interesting Bulletin Tells About Foreign Plant Tests

Results of experiments in crop production and field work can now be without interest to all agriculturists, and, therefore, a publication describing them must be exceptionally welcome. Such is the Bulletin No. 1 of the Experimental Farms, Dominion Experimental Farms, that gives a summary of results reached at the experimental farms throughout the country, and that can be had free on application to the Publications Branch, Department of Agriculture, Ottawa. There are included also some recommendations as to the varieties to grow, or crop production methods to adopt, resulting from the results of experimental work in the various provinces. A variety of tests at the Central Experimental farm in Indian corn, for instance, show that the varieties in ears of twelve experimented with were Quebec Yellow, Wimond Yellow Dent, White Yellow, and Yellow, and that, while of the six maize varieties proper, Argentine Yellow gave the highest yield in tonnage, White Corn, Golden Sweet, and Phillips' Wisconsin No. 7 reached a more advanced stage of maturity. Eighteen varieties of turnips were tested, and the best were found to be carrots and four of sugar beets. Of the turnips nine varieties produced over 2½ tons dry matter to the acre, and the best mangel was 200 lbs. of crop with 2 tons, 1,905 pounds dry matter to the acre, and Ontario Champion 2½ tons of crop and 2 tons, 1,950 pounds dry matter.

With a view of securing data bearing on the production of root crops, the root crop was selected, and the best root crop profitably in Canada, a great number of seed roots were selected, not only at the Central Farms but also at the experimental farms and stations in the eastern provinces. At the Central Farm about 12,000 mangels of the Long Red variety and 12,000 mangels of the Short Red variety were secured for the purpose from the general farm crop. In addition, about 3 tons of mangels of the Long Red variety were secured from the plots grown for variety tests by the Division of Forage Plants.

In addition to forage plants many tests were made for hardness, quality and quantity. In order to arrive at a more understanding of the nature of Canadian grasses and sedges, arrangements were made to secure, through exchange, a representative collection of grasses and sedges. Numerous duplicates were prepared for this purpose and sent forward. The reports on the subject and lists of names of farms and stations will be found of the greatest interest, each specially to farmers in the respective province represented.

Yours truly,
JOHN WALSH.

Lachute, Que., 25th Sept., 1908.
MINARD'S LIGHTNING CO., Limited.

Gentlemen.—Ever since coming home from the Boer War I have been bothered with running after horses, and I tried many salves and liniments; but also doctored the horses all the time. My mother got me to try MINARD'S Lightning, for the blood, but got no relief. Then I got a horse and my mother got me to try MINARD'S Lightning, and I have worked every working day since.

Yours truly,
JOHN WALSH.

Eye Not to Blame

Assyriologist Says Ark Navigator Brought Fair Man

If Adam and Eve were to live today they might find basis for a suit for libel against the ages who have been laying on their shoulders the blame for the flood. The Ark Navigator, Prof. Langdon, professor of Assyriology in Oxford University, who came to the University of Toronto last week, has just published a paper over an ancient Sumerian tablet.

Adam and Eve did not fail, Prof. Langdon says: it was Noah. There was no flood in the Garden of Eden. Noah did not eat some of the fruit of the cassia tree in the garden of paradise, which had been forbidden him. Noah's flood was not caused by ill health and decreed an early death, instead of living 90,000 years, like his ancestors.

Indeed, such as the Sumerian tablet at the British Museum is believed to be nearly 5,000 years old, inscribed before the days of Abraham. Prof. Langdon has shown that the Bible story of Adam's fall is a version of this ancient document. The Sumerian tablet, which is at least 1,000 years older than Genesis, is the oldest record of the sort of existence.

The Sumerian story, as translated from a tablet in the museum, is told in a work by Dr. Langdon.

Both the Sumerian and Babylonian accounts place the flood at approximately 5,000 years ago, between the creation and the flood is fixed at 420,000 years. Then came Noah and the cassia tree and temptation.

After Noah's flood, before the flood, the Sumerian tablet relates, beasts were harmless, and there were no storms. No one said, "There are old men." "There are old men."

Everything was rosy and everybody happy.

Then came the Creator of all inhabitants, according to the tablet, was a woman, Ninua, who made them out of clay. She tried to intervene for her creation, but was rebuffed by the old king, Tagtag, who is the Sumerian Noah. For him she built a ship.—Chicago Tribune.

No one need endure the agony of corns with Holloway's Cora Cure at hand to remove them.

Displeased Parent—Molly, I find you have been buying three pairs of gloves without permission. Why did you do that?

"I'm sorry (aged twelve)—Why, daddy, I was obliged to have some gloves; I hadn't a pair to wear."

Displeased Parent—it was very nice of you to buy the gloves without asking your mother or me about it.

Mischievous Molly—Well, never mind, daddy, dear; they won't cost anything. I had them charged!

Hessian Fly in the West

Information Regarding This Pest is Given in Government Bulletin No. 1. The pest is known to farmers as a serious pest of cereal crops; during the present season it has caused the loss of millions of bushels of wheat in the United States and in Canada. In Western Canada its depredations fortunately have not attained the extent experienced in other regions of the continent, and it is advised to advise the farmers in the western provinces. A variety of cereals, especially wheat, are affected, and the pest is described in the same bulletin, which is entitled "The Hessian Fly and the Western Wheat Stem Maggot in Manitoba."

The results of this investigation, which was conducted by Mr. Norman Criddle for several years, have now been published in the Department of Agriculture Bulletin No. 11. Any inquiries for information regarding

the insect pests should be addressed to the Dominion Entomological Department of Agriculture, Ottawa.

Requisites on the Farm.—Every farmer should have a supply of Dr. Thomas' Electro Oil on hand, not only as a ready remedy for lice in the family, but because it is a good remedy for many other great pests. As a substitute for liniment oil for horses and cattle affected by colic, far surpasses anything that can be administered.

Right Hon. Secretary of State—You have long been a leading supporter of our cause, and I shall be glad to do what I can for your son. What can I do?

Fond Parent—By God, sir, if he could do anything I should not think

Steel Helmet's Success

Steel helmets have now been issued uniformly throughout the French army to prove that they are a useful protection to infantrymen. They have saved a large number of men from being captured, and either wounded or killed by shell fire and have effectively warded off the side strike of rifle bullets. The soldiers are enthusiastic about their use.

It is officially stated that the thin chrome steel helmets cost less than 7 cents each.

Mirard's Liniment Cures Colds, etc.

Mrs. Eze—Your maid is too familiar.

Mrs. Wye—If I make her keep her place bed's quite her job.

The NATIONAL—Canada's new Transcontinental Train.

Scenic Gems on the New Route

With the departure from Toronto of "The National" on its first transcontinental run, the new route has opened between Eastern and Western Canada; a new steel highway created through the heart of the country.

The inauguration of through fast passenger service on the new route marks an important epoch in the Dominion's development. A vast new area of great scenic beauty, hitherto without moderate facilities for travel, is now easily of access. Its mineral, lumber and agricultural wealth can now be tapped and its opportunities developed, while a new trail is created for the movement of traffic through the heart of the "Highlands of Ontario," a region of great beauty, with its winding streams, and replete with natural beauty.

From North Bay the steel stretches away northward for 125 miles through the Timiskaming region, to the Canadian Government Railways, making a connection with the line to Sudbury. The trip is about forty-two hours. The first stage of the journey is through the heart of the "Highlands of Ontario," a region of great beauty, with its winding streams, and replete with natural beauty.

HUGE SUMS HAVE BEEN SPENT TO ATTRACT IMMIGRANTS TO CANADA

THREE MILLION IMMIGRANTS IN PAST 15 YEARS

A Booklet Issued by the Minister of the Interior gives some Interesting Facts and Figures Concerning the Immigration Work Carried on by the Dominion During the Past

Canada has expended thirteen and a half million dollars in the past fifteen years on immigration work in all parts of the country. This does not mean a direct increase in population by new arrivals of about three million people. This is a whole lot more information concerning immigration work is contained in a very interesting little booklet issued by the department of the Interior, called "Immigration Facts and Figures."

Immigration has been encouraged from the British Isles, the United States, and certain European countries, but, of course, at present the campaign is not being carried on in Germany, Italy, Russia or Southern Europeans or Asiatics have not been wanted at any time.

There are various ways in which the attractions of Canada are brought to the prospective emigrant. Regular agencies are established, newspaper advertising, exhibition of pictures, exhibits of grain, and other products; and in Great Britain exhibition wagons are sent around through the country districts. United States exhibits are made at the big fairs and expositions. In Great Britain and Europe, agencies are established, with help of booking agents, whereby a bonus is paid for the emigrants who are directed to the country. Recently in the past year, about 18,000 people in the majority of instances they are not complete for all that period, as more detailed and individualized records regarding arrivals in the dominions are constantly being introduced.

During the past 15 years there was a total immigration of 3,650,000, the largest number from any country being those from the British Isles, 1,169,432; followed by the United States, 1,056,000. Of the remainder the Austro-Hungarians, which include the Galician, Ruthenian, 200,000; Germans, 38,000; Italians, 119,000; Russians, 97,000. These are round figures.

U. S. Fleet! Can Traverse Panama in a Day

Proof of This Afforded in Handling of Naval Practice Squadron

Proof that the entire present main American battleship fleet, made up of 140 ships, could pass through the Canal in a day, was furnished a total of twenty-one, could be passed through the Panama Canal in one day had been affected by the naval practice squadron of the U.S. practice-squadron in the canal locks on its way to and from the Panama Pacific.

The squadron, composed of the battleships Missouri, Ohio and Wisconsin, the巡洋艦 Mississippi, which have so far been mentioned were passing through the locks at Pedro, Miraflores, the Missouri and Ohio simultaneously in parallel, with the Wisconsin directly in the rear.

Patriotism and Prices

Necessary That the Producer Should Receive Fair Prices

Patronage production was the last of the campaign, but it employed the leading men of the country in the work of teaching the farmers how to grow better crops.

Fair prices might be the label on a campaign that could employ the leading men of the country to teach the right prices for the crops they have grown.

Farmers know as much about raising crops as they do about selling crops, and wisdom helps the farmer to raise crops. Outside wisdom might help the farmer to sell crops. The patriotic production campaign will be discontinued if the farmer is to receive no more money for the long crop of 1915 than he received for the short crop of 1914. That may be the inevitable outcome of the workings of the law of supply and demand. Fair prices for the long crop are necessary; severe punishment is unnecessary. The day has helped to place the Dominion in a position to benefit decidedly from any growing profits, whether from greater munitions, trade or the sale of foodstuffs.

Wolves Aid Germany

A Paris correspondent writes:

"The last word in the war, but this has liberally happened at the Chateau de Montjustin, which lies midway between Paris and Verdun, about twenty miles from Belfort. The place is famous for its breed of horses, and a spirit of government determination is still there left. One night, last month four of the horses, while grazing in a field close to the chateau, were attacked and wounded. They lay dead for hours until they were nearly dead from fright and exhaustion. Two were killed, the others being wounded. The horses were probably driven from the Argonne or the Vosges by the military operations. It is nearly sixty years since old wolf was chased from France, and the inhabitants are now so terrified that they will not venture out of doors after nightfall."

Good Humor

Pessimists Will Receive a Severe Jolt

British war orders of \$250,000,000 and French, Italian and Russian contracts amounting to all in as much more, we may put it, as \$1,000,000,000 for the country's war effort. To this colossal amount must be added the enormous sum of \$100,000,000 for the destruction of the British Empire, the biggest in history of the dominion.

These two facts, namely, one thing only, namely, that the war is going to be won in the fall and winter, it is impossible that such vast sums of money should be coming here without finding a market for them, for the better. That is the answer to those pessimists who say that the coming winter is going to be a bad employment period, due to unemployment and general hard times. Those firms which have profited an optimistic outlook through the tight money policy, are following, as the outbreak of the war, are going to reap the advantages of their place and energy. Canada has been lost to us, but we have kept the flag flying in the lean times just after the commencement of the war, and we have continued to keep it flying in the public eyes, as the ones who are going to get the pickings soon when the good times break."

To the Manufacturers

But for the promptness, as well as courage, of the Canadian soldiers, the road to Calais would have been lost. We must make that our one cause, in order to hold what they have commercially, and to gain more territory. Canadian soldiers have had the opportunity with their relatives of other nations in the world, that they must be able to make a living, and they will be able to do so.

"To the 'goal.' And they better, time to the goal. And they will be able to do so, but they must be able to make a living, and they will be able to do so.

"In the way of government bonds, we like to be among the best."

"In the way of government bonds, we like to be among the best."

Better Prices For Crops

Banking and Business Interests Should Co-operate With the Farmers

At a meeting held recently in Winnipeg at which representatives of various organizations of business in Canada were present, the matter of prices likely to be received for the produce crop was discussed. It was the unanimous opinion of those present that a heavy movement on the part of the farmers to sell their grain at the present price would be calamitous to the market price, lower levels and that a more leisurely method of marketing were followed by the farmers instead of selling off their grain at a better average price all round would be seen.

A glance at the figures given regarding the destination of the immigrants shows that the eastern provinces got about half of the new arrivals.

There is one class of immigrants that money which is spent on immigrating is not returned in any way—the Chinese. In fact the Orientals have paid very large amounts, particularly in the four provinces, and in Great Britain the amount placed in the market in the next few months with the certainty—as far as the present conditions can be predicted—will be a considerable lower level.

Lake and ocean boat space is more scarce than in previous years; rates for which are higher than ever before. Much more admitted, it must not be inferred that all who make application are allowed to take up their places in the Dominion. During the past 12 years there have been 123,500 rejections for various reasons, ranging from sickness or lack of funds. Many of these applicants have gained there been during the past dozen years over 10,000 people rejected.

With the occupations of the immigrants it is shown that those from the British Isles and others from the continent are about equal division between farmers and general workers, as there were a little more than 500,000 of each. A very great number of these immigrants come across are farmers, there being almost half million, while the laborers do not total 200,000.

Alberta Utilities
Commission

It is Honor Lieut.-Governor Brett, having been duly installed, his first officia-
lact, at the request of his chief minister,
was to sign an order-in-council
appointing the members of the Alberta
Utilities commission, which is destined
to be of great service to the people of this
province. The members of the commission
are George Huldy Vicars Bulley, chair-
man; John Stocks and Judge Arthur
Allen Carpenter.

The commission will enjoy extensive
powers, and combines the prerogatives of
the utility commission of Manitoba and
the municipal board of Saskatchewan.
The board will not only have oversight
of utilities owned by the province, but, at
the request of civic bodies, will take
over the supervision of municipal utilities.
The board will have power to inves-
tigate all proposed civic bond issues, and
the O.S. of the board will be a
guarantor to bond buyers of the sound-
ness of the credit of the municipality
asking the loan.

This will undoubtedly have the effect of checking unnecessary
ventures into the bond markets, and
establish the credit of Alberta municipalities on an eminently satisfactory ba-
sis. The commission will have offices in
the legislative buildings, and will sit
throughout the province as occasion may
arise.

The salaries have been fixed on the
same basis as those of judges of the
supreme court, the premier, at the time of
introducing the bill creating the com-
mission, having stated that the commis-
sioners should have the status of supreme
court judges.

The Japanese Red Cross
Japan is a country which might very
conceivably, if the present war is pro-
longed, play a very important part in its
final settlement. If Japanese troops
were sent to Europe, they would of course
be accompanied by Japanese Red Cross
and that Society would have an opportunity
of demonstrating to the world the
perfection of its organization.

It has a permanent fund of 15,000,000
yen, and a membership of 1,632,752 over
one thirty-fourth of the total population.
It possesses a trained corps of nurses to
the number of 3,000, and its total active
personnel amounts to nearly 5,000 per-
sons.

The strength of the Japanese Red Cross
is due to the fact that it is a national in-
stitution, actively favored and supported
by the State Government and the Imperial
Court. The Society was founded in
1887 by the Emperor. Its badge is
modeled on a design of a comb worn by
the latter—a cross surrounded by ban-
loo leaves.

The Central Hospital at Tokio was
presented to the Society by the Emperor
as well as the land on which the Executive
Building is situated. The President
and Vice-President of the Society are
representatives of the Emperor.

It is thus apparent that the Red Cross
is a definite and vital part of the state
machinery in Japan. The Society proved
its national value in the Russian war,
and Japan is thoroughly convinced that
no nation can successfully conduct a
great war without an efficient and well-
endowed Red Cross organization.

Harry N. Rose, ex-manager of
the Rocky Mountains Sanatorium,
left for Edmonton on Wednesday
morning.

Bellevue Happenings

Mrs. D. Morris is visiting friends in
Lethbridge.

Misses Mitchell and Orr were visit-
ing in Lundbruck this week.

The Bellevue club rooms will be
ready for use in about two weeks.

Don't fail to ask for coupons
when trading with S. T. Humble,
Hillcrest.

Mrs. Lethlie and family left this
week for Montana, where she intends
staying for some time.

Don't fail to ask for coupons
when trading with S. T. Humble,
Bellevue.

The Bellevue Methodist Sunday
school is in full concern. Last
Sunday's attendance reached 148.

The lumber has arrived for the
new Italian Co-Operative store,
which is to be erected next the
Bellevue hotel.

Dr. Miller, supt. of technical
education, lectured in the school on
Wednesday night. It is expected
that the night classes will be re-
sumed again this winter.

A party from Bellevue climbed
Turtle Mountain on Saturday last,
and "a very pleasant time was
had." A. W. established forever
his prowess and some other things,
and T. M. B. proved his fortitude
and patience. A. K. can also be
said to have settled things along
the lines—outside lines—of mark-
manship. Everybody sorry but
the game!

Look out for the operetta to be
put on by local talent in the
Workers' hall on Friday, November
12th. This will be something
new for Bellevue, and as it is under
the direction of Mrs. H. Barlass
it will not only be new, but first-
class. Keep the date open. The
admission will be 50 cents. 50%
of the proceeds will be given to the
Patriotic Fund and 50 per cent to
the Bellevue Club Rooms.

September Honor Roll
Hillcrest Mines School

Grade II.—Tony Zanish, Steve Ken-
nedy, Mike Ondrik, Flora Brown.

Grade III.—Alice Bogush, Lambert
White, Mary Stewart, Albert Aubertin.

Grade IV.—Gabriel Legarde, Ethel
Crowther, Martin Spela, Homer Auber-
tin.

Grade V.—Alice Taylor, Steve Spela,
Eric Morley, Leonard Beaver.

Grade VI.—Hugh Stewart, Alfred
Taylor, Clifford Richards, Beatrice Ge-
rardin.

Grade VIII.—Arnold Smith, Grace
Bowie, Margaret McGeney, Jessie Smith.

The above are arranged in order of
merit.

L. A. WEISSZUGER,
Principal.

Dr. Russen returned to Spokane
on Monday of this week.

OF LOCAL AND GENERAL INTEREST

The Red Cross ladies desire to
thank all who contributed towards
the Trafalgar Day collections.

Book your order with us at once
for private Christmas Greeting
Cards. We have a magnificent
line of samples. Call at our office
and ask to see the Western Series.
You can search all Alberta and not
find a nicer lot of cards to select
from.

Frank Happenings

A. L. Blais was a business visitor
to Lethbridge on Wednesday.

Mrs. E. Morgan returned from
Lundbruck, where she had been
visiting Mr. and Mrs. Joe Morgan.

Hector McKinnon, brother of
A. J. McKinnon, has arrived from
the east and started work at the
mines.

"Father" Watson was down on
Monday, visiting old acquaint-
ances. He leaves shortly with his
family for the Old Country, where
he will engage in mining.

Const. S. Smith has been added to
the local detachment of the R.
N.W.M.P., a successor to Const.
Persons, who has been transferred to
Hillcrest.

The opera house management
announces that the first episode of
"The Diamond From The Sky,"
will be shown on Saturday night.
Don't miss it.

Germany again is closed from
Basle to Constance to travellers of
every nation. It is assumed this
is to keep secret the movements of
German troops.

A number of local people axed
of the fine weather and good roads
on Sunday to take an auto ride to
Ferrie. Some of the cars easily
mounted the Summit with "big
loads."

Apple-Week at Handley's.
Got a case for Holloway, from
\$1.60 per case up. Put a case in
the cellar for winter. Also the
best B.C. potatoes ever seen in this
town—\$1.10 per sack.

The following became members
of the local Alpine Club on Sat-
urday last and journeyed from Bla-
irmore to Hillcrest over the summit
of Turtle Mountain: Messrs. T. M.
Burnett, A. E. Williams, A. Kelly;
Misses Williams, Lowen, Orr and
Cafier.

An application is to be made before
the appellate division of the
Supreme Court, looking to the
quashing of the conviction of John
Hawkes of Wetaskiwin, who
was found guilty of murder of Mrs.
Rosella Staley, and sentenced to
hang at Macleod on December 29.

Coupons guaranteeing 10 per
cent in yearly dividends will be
given free when trading with the
following stores: F. M. Thompson
Co., Blairmore; S. T. Humble,
Bellevue; Blairmore Pharmacy,
Hillcrest; and J. & E. Wylie,
Bellevue. Don't fail to ask for
coupons.

The first service of the re-orga-
nized Anglican congregation was
held in the new session hall on
Victoria Street on Sunday morning
last, Rev. Mr. Clay of St. Albans
as the officiating priest. The program
of his sermon traced the development
of "places" of worship, and
expressed the hope that the church
in Blairmore might realize its true
usefulness. A large congregation
attended and the service was bright
and interesting. Mr. Clay is a very
frequent speaker and will no doubt
meet with success in his efforts in
Blairmore. Service next Sunday
will be at 11 a.m., followed by a
service of Holy Communion. Sun-
day school at 2.30.

United Church Service

Rev. A. D. Pringle, of Fernie,
will preach in the Baptist
church both morning and even-
ing on Sunday, on behalf of the
United Presbyterian and Baptist
congregations. It is hoped that
a large number of people
will turn out at both services.

H. E. Lyon visited Macleod on
Wednesday.

It is now reported that the 13th
C.M.R. will winter in Medicine
Hat.

Next year's convention of Alberta
municipalities will be held in
Edmonton.

Don't fail to ask for coupons
when trading with the Blairmore
Pharmacy.

J. Handley has unloaded a
couple of cars of fruits and vegeta-
bles this week.

Service will be held in the Pres-
byterian church, Blairmore, on
Sunday morning.

Send to me for free samples
Wheat and Chicken Feed, \$1.55
Cowley—C. H. POWELL.

Don't fail to ask for coupons
when paying your account at the
K. M. Thompson Co.'s on pay-day.

Const. S. Smith has been added to
the local detachment of the R.
N.W.M.P., a successor to Const.
Persons, who has been transferred to
Hillcrest.

The opera house management
announces that the first episode of
"The Diamond From The Sky,"
will be shown on Saturday night.
Don't miss it.

On Sunday next, after the regu-
lar morning service, the Sacrament
of Holy Communion will be ad-
ministered at the Anglican church.

The West Canadian Collieries
Co. are filling an additional con-
tract with the C.P.R., from the
Greenhill mine, of three hundred
and fifty tons per day.

Pete Niesco is talking of open-
ing up a meat market in Blair-
more. Pete was in the butcher
business here ten years ago, in
partnership with William Bernard.

The British transport Marquette
was torpedoed and sunk in the
Aegean Sea, with a probable loss
of 99 of her personnel. The Marquette
was a steel steamer of 7,057 tons.

We are just in receipt of a post-
card from Arthur E. Farmer, who is
in "Somewhere in France." His
message in full is "I am quite
well," and even that passed the
censor.

Miss Gene Calkins returned to
Blairmore on Tuesday, after an
absence of several months, and has
again taken up duties as steno-
grapher in the law office of L. H.
Putnam.

The Supreme Court will be in
session at Macleod next week,
when a number of criminal cases
will be tried. Among them will be
the case of Philip Hart, who will
stand trial for the murder of his
wife on October 12th.

Dr. James C. Miller, superin-
tendent of technical education,
visited Blairmore on Monday even-
ing to confer with the school
board and others in connection
with the establishment of a night
school for the winter months. A
committee was appointed to canvass
the field to find out as to whether
a sufficient number of pupils were
available to warrant the carrying
on of the proposition. If they find
the desired number, it is likely
that the classes will commence
about November 1st. Courses in
English for Non-English speaking
and courses in coal mining will be
given. Miners' preparatory courses
will include English, mathematics,
mechanics, and applied science,
surveying and engineering, and
rescue and ambulance work. Coal
mining courses include: preparation
for third class certificates, pre-
paration for second-class and pre-
paration for first-class certificates.

The eight classes will be open
for the benefit of young men and
women, and those who are in a
position to avail themselves of the
opportunity offered should hand in
their names to the schoolboard, or
to Mr. Robert, or Mr. Green of the
West Canadian Collieries.

paration for first-class certificates.

The night classes will be open
for the benefit of young men and
women, and those who are in a
position to avail themselves of the
opportunity offered should hand in
their names to the schoolboard, or
to Mr. Robert, or Mr. Green of the
West Canadian Collieries.

D. C. Drain is limping on two
crushed toes.

A tall slim man went aboard the
Holland-American steamer Zaandijk
at Boston the other day, and an hour later
the same man, seeming much plumper, came down the
gangplank, walking sideways through the
door. Customs Inspector Frank Wood was impressed
by this sudden development of adiposity and stopped the
stranger. Concealed in his clothing
the inspector found several hundred choice cigars, which he
confiscated.

Bellevue Patriotic
Dance Returns

Bellevue, Alta., October 26th, 1915.

The committee in charge wish to thank
all who by either manual or material as-
sistance helped to make the dance a
financial success and also especially we
thank Mr. Williams and Mrs. Hallworth
and the Misses Williams, Hoor and Bowen
for their untiring efforts in securing
and distributing refreshments and
selling tickets.

BELLEVUE PATRIOTIC COM.

Blairmore Red Cross

The Blairmore Branch collected
sixty-eight (\$68) dollars on Tra-
falgar Day, in response to the call
of the British Red Cross Society.
This amount was forwarded to the
Provincial Secretary. Reports from all
districts show a liberal response.

Sowing meeting Tuesday afternoon.
A new shipment of ma-
terials has arrived from Calgary
and there is plenty of work for all
who will come.

The membership list for the new
year beginning October the first
and ending January 1st, 1916, a large
number have promised subscriptions,
and these can be paid to the President,
Secretary or Superintendent of Districts.

The Provincial Secretary ac-
knowledges receipt of \$3.00 from
this branch for the Red Cross Con-
valereet Home at Oden.
